

AI + Structured Content: The Dynamic Duo of Pharmaceutical Documentation

Docuvera and the transformation of content as we know it.

Are you ready to unlock the future of pharmaceutical documentation with AI-powered automation and precision? We're forging the power of AI and structured content together to save time, improve accuracy, and create seamless content transformation.

1

Content design done right

Get the right content in the right place — with minimal human effort.

- Auto-propagation**
Transform plain content into local documents in .g, .one, data sheets, or local files through automated workflows.
- Search and suggest**
EcoRank® find and suggest the most relevant content for any document creation.
- Paraphrasing and auto-completion**
Stipulate repetitive tasks like sentence completion and content variation.

AI + structured content for the content design win

- ✓ Near instant generation
- ✓ Reduced manual tasks
- ✓ Improved content reuse
- ✓ Smoother document assembly

2

Integrity: Content that passes the test

Optimized checks for quality and compliance so content is always correct.

- Accuracy validation**
Enforce content, matches corporate or industry standards, including style guides and glossaries.
- Template validation**
Catch the errors, templates and styles and always used, reducing errors.
- Glossary compliance**
Keep terminology accurate and up-to-date with automated checks.

Rise the benefits of built-in quality control

- ✓ Reduced error rates
- ✓ Being compliant with industry standards
- ✓ Consistent look and structure
- ✓ Peace of mind through quality checks

3

Transform content on the fly

Effortlessly change content format, tone, and language to suit your needs.

- Verb tense adjustments**
Convert future tense clinical protocols into past-tense reports.
- Language translation**
AI-powered translations to make content available in any language.
- Document summaries**
Automatically condense large documents into concise summaries.

Reformat existing content with ease

- ✓ Time-saving document transformation
- ✓ Language accessibility
- ✓ Consistent tone and format
- ✓ Simplified communication

4

Discover deeper content enrichment

Just add metadata to unlock the full potential of your content.

- Metadata tagging**
Automatically tag content with essential metadata to enhance trackability.
- Topic classification**
Identify and classify topics automatically for easier document organization.
- Information extraction**
Pull key information from documents and make it accessible to other systems.

Search, and optimize

- ✓ Enhanced discoverability
- ✓ Easier document organization
- ✓ Better information access
- ✓ Better system integration

5

Content distribution, but make it better

Distribute your content across channels automatically with AI.

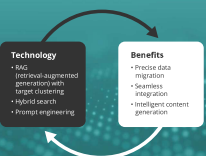

- Digital submissions**
Submit generated data directly to regulatory bodies, bypassing traditional document formats.
- Chatbots**
Feed target content to chatbots for quick, accurate responses.
- Export modifications**
Seamlessly transform content into different formats based on the destination.

Discover the perks of boosted content

- ✓ Faster regulatory submissions
- ✓ Improved customer support
- ✓ Flexible content formats
- ✓ Scalable content delivery

Enabling Technologies: Powering Docuvera's AI Capabilities

Docuvera leverages cutting-edge technologies so every piece of content is accurate, relevant, and delivered in the right context.

The future of pharmaceutical documentation is now. Leave the old, time-consuming ways of doing medical documentation in the past. Together, AI + structured content are ushering in a new era for the pharmaceutical industry — and Docuvera is leading the way.
